

INTEGRATED DIGITAL RISK PROTECTION PLATFORM WITH SELF IMMUNITY

Foresiet is an Intelligent INTEGRATED DIGITAL RISK PROTECTION PLATFORM (IDRP), a unique combination of Human Intelligence (HUMINT) and Applied Research (HUMAN+TECHNOLOGY) that provides Digital Trust with context to security. Our Solution has a unique capability to Identify, Protect, Detect, Forecast, Respond, and Recover Breach epidemic with self-immunity.

It empowers our customers and provide unbiased support to fight against Cybercrime using award-winning platform that integrates Identity, Data and Asset with Threat Advisory engine. Foresiet provides an integrated platform with plug and play option to predict the cyber-attack with Comprehensive, Contextualized, and Actionable Intelligence

We

AI-enabled Cybersecurity company providing assurance even under the inevitable threat landscape

Access 100+ Vector

- Unpatched software (CVEs)
- Phishing
- Web and ransomware
- Credentials
- Encryption issues
- Misconfiguration
- Certificate issues
- Exposed cloud bucket

Reach

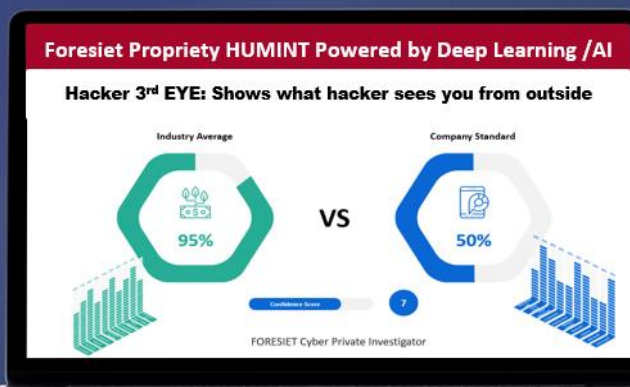

Scan Billion of Content across internet including Social, deep and dark web

Recover

DIGITAL RISK VIEW

What we do? Securing Future with Multidimensional Approach

We provide a new equation to measure and predict the digital risk and help organization to protect against targeted attack. It provides 360-degree visibility with actionable intelligence. Foresiet an AI-based engine drives relationship and analytics dashboard that empower customers to gain insight, make better decision and proactively act on the overall - Attack Surface | Threat Actors | Advisories | Compliance | Other correlated data.

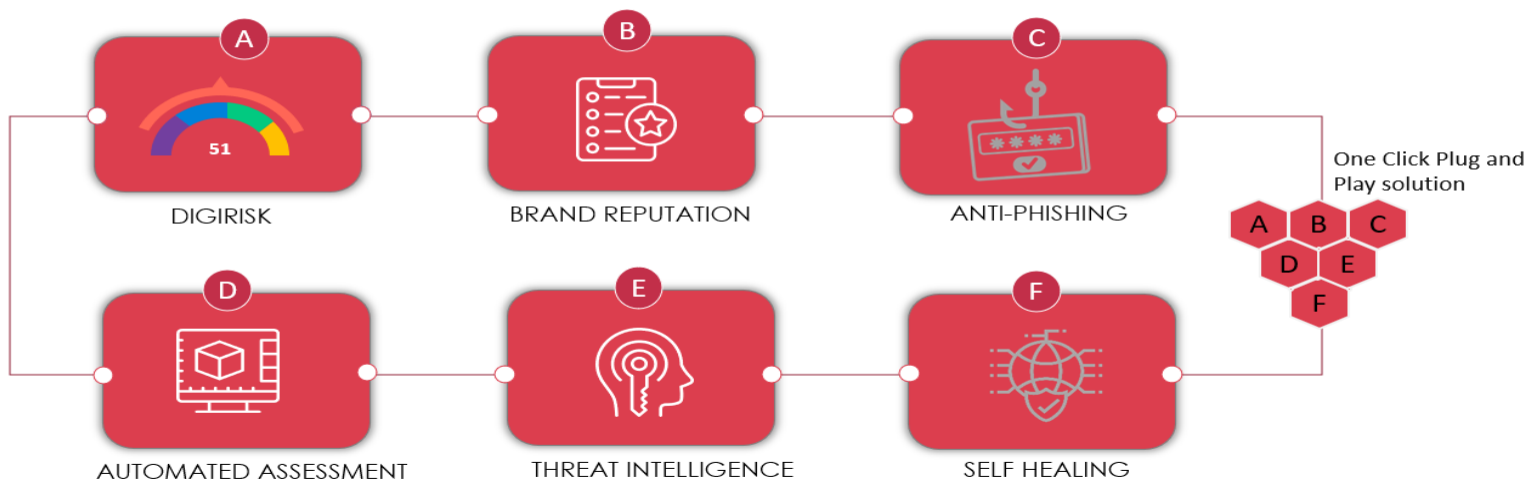

We have a strong ability to scan the complete Internet (social, deep and dark web) to bring context specific thread intelligence which is further efficiently leveraged by our integrated modules to predict the Cyber Attacks in multi-dimensional scale.

Foresiet stands out with its **6 Flagship INNOVATIVE Integrated** products to provide context driven security using ML/AI

FIRST INTEGRATED DIGITAL RISK PROTECTION PLATFORM WITH SELF IMMUNITY

A UNIQUE approach with 360 degree actionable intelligence

"We Identify, Protect, Detect, Forecast, Respond and RECOVER Breach Epidemic"

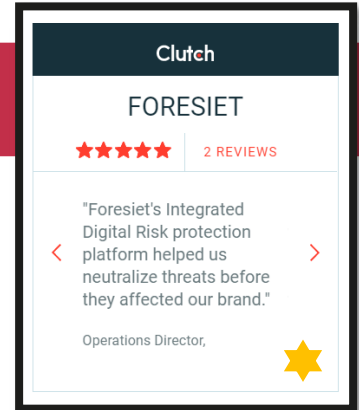

FORESIET SOLUTION KEY FEATURE Search (ML/AI)

Adaptive Cyber solutions that work for your business. Single threat intelligence platform for proactive compliance & risk management

Improve your compliance capabilities with Digital Risk and intelligence Threat Platform. Compliance regulations, including ISO, NIST, GDPR, PCI, SOX, CCPA, HIPAA, SAMA, CITC, etc., require organizations to establish security and audit controls to ensure that business and customer data is protected.

Functionality	Foresiet
Automatic inventory & Risk Assessment	Continuous External security monitoring, Attack Surface Visibility, Vulnerability discovery etc. Identify and map relationship between asset- IP address, port, software with breach likelihood mapping.
Industry Benchmarking	Compare your vendor's security posture against their industry peers to help you decide whether to mitigate or stop using high-risk vendors
Integrated Anti-Phishing protection & Posture improvement	Provide behaviour-based phishing detection and prevention solution for internal employees. Neutralize Phishing Campaign
Integrated Penetration Testing	Provide continuous automated penetration testing to understand the real threat without waiting for a yearly or half yearly vendor-based assessment.
Integrated threat intelligence	Identity Threat & breaches proactively including credential, PII, Data, Credit card, CVEs, etc.
Dark web monitoring/ Data leak detection	Identify and protect from Dark web threat across various channel-Messaging Platforms, Cybercrime Forums, Black Markets, Dark and Anonymous Networks, Leaked DBs, Data Leakage Sites, Paste Sites etc.
Brand Protection and Fraud Management	Identify Security incident beyond your perimeter including waterhole attack, internet fraud, rouge application, rouge website, typo-squatting, Cybersquatting, Code repositories etc.
Security scorecard	Access Digital Risk to mitigate, identify trends and protect against bad cybersecurity posture
Compliance Assessment	Automate compliance assessment using questionnaires using workflows to get deeper insights into your vendors' security. Use our library of standard questionnaires to access across vast controls.
Predictive capability	Provide predictive breach avoidance capability to access the breach
Incident response with Automated alert	Autopilot alert to mitigate threat proactively. Help to initiate Zero trust model.
Workflow	Easy mitigation capability using automated workflow to onboard mitigation and vendor team for assessment and threat closure.
Takedown	Automated Takedown for security violations.
Executive reporting	Create up-to-date reports on your security posture to identify the issues that pose the highest risk and how to improve your security posture.

HOW ARE WE DIFFERENT?

SIMPLIFIED SECURITY A ONE CLICKS SOLUTION.

INNOVATION

- Plug and Play INTEGRATED Security using Human Intelligence (HUMINT) and Applied Research (ML/AI).
- FORESIET UNIFIED VIEW
- 1-hour deployment
- Foresiet detect the short live phishing site using Artificial Intelligence (AI) and threat Intelligence, which are "NOT Detected" by existing provider
- Intelligent Dark Web Monitoring
- Foresiet can locate stolen credential/PII and Stolen Data in hours and, in some cases, minutes
- AI-enabled social risk management engine.
- User behavioural Intelligent

Learn how we can help securing your Digital asset

KEY FEATURES

- Plug and Play Deployment: Hiding the extreme complexities of cyber security and provide customer with most flexible option to secure identity, data and assets.
- Round the clock monitoring: 360-degree visibility of enterprise identity, data and Assets using Inside-out (Internal), Outside-In (Outside) and Outside-out (Internet, Deep and Dark Web) Security Assessment
- Attack Surface reduction with actionable intelligence
- Cyber Security Posture Rating with Industry benchmarking
- Dissolve threat and Targeted attacks
- Automated VAPT and Single pane view
- One Click Remediation
