## Solution Alliances

**Bitdefender**<sup>®</sup>

Endpoint Security Solutions  
& EDR

As the world's largest security solution provider, Bitdefender protects half a billion users by harnessing the power of intelligent solutions, employing a global network and pioneering next-generation technology. We have been delivering award-winning solutions for over a decade and have pioneered innovative approaches to security across every major industry.

**ENDPOINT  
PROTECTOR** | by CoSoSys

DLP  
Cross Platform DLP

Discover, monitor, & protect your sensitive data with Endpoint Protector, advanced cross platform data loss prevention. CoSoSys offers a rich portfolio of security products and features for device control, content protection, & eDiscovery for Windows, macOS and Linux, as well as the development of applications for portable storage device encryption and enhancement.

**safetica**

Data Loss Prevention

Data loss can occur any time your sensitive data is accidentally or intentionally shared: an email with sensitive materials gets forwarded to a competitor, a laptop with company database gets stolen or an employee walks away with comprehensive client lists. Data loss prevention (DLP) solutions track this unwanted data loss or theft, report on it & can even prevent those accidents thanks to rules & policies. With a DLP solution from Safetica, you will be prepared to face all these adversities head-on.

**ZECURION**

DLP  
Insider Threat Security

Zecurion is a world-class vendor of IT security solutions helping companies to protect against insider threats. Easiest to implement and the most technologically advanced DLP system with more than 10 technologies, used together to minimize errors and false positives. With Zecurion, you can easily monitor and manage employee access privileges with advanced security measures and real-time alerts.

Database Access  
Management.

Cyral provides controls for privacy, compliance, governance, and protection thereby reducing risk, complexity, and cost for managing structured data in the cloud. The Cyral platform discovers data, unifies access controls for users and applications, enables fine-grained authorization policies and provides complete monitoring and reporting. Cyral's technology allows customers to implement data security controls using their existing, centralized entitlements, thereby simplifying administration and automating remediation.

**FSPROTECT**

Active Directory Security  
Assessment

Advanced threat actors often exploit weaknesses in Active Directory. FSProtect aims to limit their maneuverability by swiftly identifying vulnerabilities, misconfigurations, and hidden attack paths inherent in its complex relationships. By detecting these issues within minutes, FSProtect strengthens defenses and reduces the potential impact of malicious activities.

Next-Gen Vulnerability  
Management

Holm Security supports cybersecurity teams in overcoming the challenge and offers a range of products and services aimed at helping organizations identify and mitigate potential security vulnerabilities in their IT infrastructure 24x7x365. The Holm Security Vulnerability Management Platform includes features such as assessments of systems, computers, IoT, OT (Operational Technology), cloud-native platforms, web applications, APIs and users (using phishing simulation). This is all designed to provide comprehensive cyber security coverage.

Digital Risk protection  
Service.

Brandefense is a cybersecurity platform designed to protect brands from online threats and fraud. It provides continuous monitoring and detection of brand-related risks such as phishing, counterfeit goods, trademark infringement, and unauthorized use of brand assets. By leveraging advanced analytics and threat intelligence, it helps organizations safeguard their reputation, prevent financial losses, and ensure compliance with legal standards.

Zero Trust Network  
Access with Passwordless  
Authentication

Zaperon is Zero Trust Security solution that protects organisations from cyberattacks by securing access to enterprise applications from any user, any device, and any location without the need of any password. It provides functionalities like Passwordless single sign-on access to enterprise applications, Robust identity and access control and AI-based continuous risk analysis of user behaviour and device posture.

Comprehensive Malware and phishing  
detection & analysis platform

VMRay is a cybersecurity company specializing in malware analysis and detection. The flagship product, VMRay Analyzer, offers automated behavior-based analysis of suspicious files and URLs. VMRay's comprehensive suite of tools enables users to analyze suspicious files, URLs, and email attachments with ease. By leveraging its powerful sandboxing technology, VMRay can safely execute malicious code in a controlled environment, providing invaluable data on the behavior and intent of potential threats.

Unified Endpoint  
Management (UEM) solution

42Gears offers a wide range of scalable SAAS based products and solutions that can help enterprises manage and secure endpoints, applications, and PCs across Windows, Apple iOS, MacOS, Linux and Android platforms. Currently, 42Gears offers enterprises a seamless, secure and scalable Unified Endpoint Management (UEM) solution. In addition to this, 42Gears is also helping enterprises to manage BYOD programs in a secure and efficient environment.

Mobile Device and  
Endpoint Management

Scalefusion is a mobile device management (MDM) solution designed to streamline and secure the management of company-owned and employee-owned devices. It enables organizations to efficiently manage, monitor, and secure mobile devices, applications, and content. Scalefusion supports multiple operating systems and provides features such as remote troubleshooting, app management, and data protection.

Remote Support & Access.

TSPlus offers a range of innovative features to facilitate efficient and secure remote work environments. Its platform enables users to remotely access their desktops and applications from any device with an internet connection, promoting flexibility and productivity. TSPlus empowers organizations to embrace remote work with confidence, providing the tools and support needed to thrive in today's dynamic business landscape.

Data Recovery / Eraser.

Stellar Data Eraser and Recovery is a suite of tools designed for secure data deletion and retrieval. The Data Eraser ensures complete and permanent deletion of sensitive information from storage devices, meeting privacy and compliance standards. The Data Recovery software specializes in retrieving lost or deleted data from various devices and file systems. Together, they provide comprehensive solutions for data lifecycle management, ensuring both secure disposal and effective recovery of critical data.

Rcyber Security  
Awareness

GoldPhish is a cybersecurity company offering solutions for phishing awareness and training. Specializing in educating organizations about the risks of phishing attacks, GoldPhish provides tools and resources to enhance cybersecurity awareness among employees, helping them recognize and avoid phishing threats to safeguard sensitive information and maintain digital security.

EPROMPTO PLATFORM  
- SECURE & RELIABLE

Complete Power and Control Over IT Assets Made Easy.

Empowering customers to manage their own devices and Business Infrastructure without the help of an IT Professional. In addition to a complete range of in-home tech installation and support services, ePrompto also offers online Support for issues that can be resolved remotely.

IPM+

Everywhere™

Resource Monitoring,  
Security & Compliance

IPM+ is a versatile endpoint management software that performs all the functions of multiple endpoint products in one single product. IPM+ endpoint suite performs the functions of energy management, Patch Management, Health Management and Productivity Management as well as Print Management on endpoints. It achieves this by performing all these functions while not being intrusive to users or organizations, offering industry standard performance index scores like PassMark and BurnTest

Software Defined  
Wide Area Network

SD-WAN, or Software-Defined Wide Area Network, transforms WAN management by decoupling hardware from control mechanisms. Utilizing SDN principles, it centralizes network control via software-based controllers, enhancing agility and cost-effectiveness. This innovation liberates organizations from expensive proprietary hardware, offering flexibility to adapt to evolving network needs efficiently.

OCR

Create, edit, and sign anywhere

Foxit, a PDF software leader, offers efficient solutions like Foxit Editor and Reader. Known for speed and innovation, Foxit's products empower users to create, edit, and manage PDFs seamlessly. With a commitment to user-friendly design, Foxit has become a trusted choice for individuals and businesses seeking reliable document management tools.

OCR & New Age  
Document Solution

Thousands of companies process more than 9.3 billion pages\* of documents and forms annually by using ABBYY technologies. ABBYY technologies save people approximately 970 million hours annually\* when converting paper and PDF documents. Leading document capture vendors use ABBYY technologies in their products. These include BancTec, Dell, EPSON, EMC2/Documentum, Fujitsu, Freedom Scientific, HP, Kurzweil Education, Kofax Image Products, Microtek, Mustek, NewSoft, Panasonic, Siemens Nixdorf, Toshiba, & many others.
